- c) Public CHNA Notice / News

I. Executive Summary

[VVV Consultants LLC]

I. Executive Summary

Osborne County Memorial Hospital – Osborne County, KS - 2021 Community Health Needs Assessment (CHNA)

The previous CHNA for Osborne County Memorial Hospital was completed in 2018. (Note: The Patient Protection and Affordable Care Act (ACA) require not-for-profit hospitals to conduct a CHNA every three years and adopt an implementation strategy to meet the needs identified by the CHNA). Wave #4 Osborne County, KS CHNA assessment began December 2020 and was facilitated / created by VVV Consultants, LLC (Olathe, KS) staff under the direction of Vince Vandelaar, MBA.

Creating healthy communities requires a high level of mutual understanding and collaboration among community leaders. The development of this assessment brings together community health leaders and providers, along with the residents, to research and prioritize county health needs and document community health delivery success. This health assessment will serve as the foundation for community health improvement efforts for the next three years. **Important community CHNA Benefits** for both the local hospital and the health department, are as follows: 1.) Increases knowledge of community health needs and resources 2.) Creates common understanding of the priorities of the community's health needs 3.) Enhances relationships and mutual understanding between and among stakeholders 4.) Provides a basis upon which community stakeholders can make decisions about how they can contribute to improving the health of the community 5.) Provides rationale for current and potential funders to support efforts to improve the health of the community 6.) Creates opportunities for collaboration in delivery of services to the community and 7.) Provides guidance to the hospital and local health department for how they can align their services and community benefit programs to best meet needs, and 8.) fulfills Hospital "Mission" to deliver.

County Health Area of Future Focus on Unmet Needs

Area Stakeholders held a community conversation to review, discuss and prioritize health delivery. Following are two tables reflecting community views and findings:

Osborne County, KS 2021 CHNA Priorities - Unmet Needs				
CHNA Wave #4 Town Hall - April 6, 2021

Key CHNA Wave #4 Secondary Research Conclusions found:

KANSAS HEALTH RANKINGS: According to the 2020 Robert Woods Johnson County Health Rankings, Osborne County, KS Average was ranked 47th in Health Outcomes, 48th in Health Factors, and 22nd in Physical Environmental Quality out of the 105 Counties.

TAB 1. Osborne County's population is 3,421 (based on 2019), with a population per square mile of approximately 4.3 persons. Roughly six percent (5.8%) of the population is under the age of 5, while the population that is over 65 years old is 25%. As of 2019, Hispanic / Latinos make up 2.3% of the population and 2.5% of citizens that speak a language other than English in their home. Children in single parent households make up a total of 27% compared to the rural norm of 25.2%, and 87.3% are living in the same house as one year ago.

TAB 2. In Osborne County, the average per capita income is \$28,226 while 13.5% of the population is in poverty. The severe housing problem was recorded at 10.5% compared to the rural norm of 9.5%. Food insecurity is 13.5%, and limited access to healthy foods (store) is 9.4%.

TAB 3. Children eligible for a free or reduced-price lunch in Osborne County is 51.1%. Roughly ninety percent (90.5%) of students graduated high school in compared to the rural norm of 88.1% and 33.2% have a bachelor's degree or higher.

TAB 4. The percent of births where prenatal care started in the first trimester is 83.5% and 4.7% of births in Osborne County have a low birth weight. Continually, 66.7% (compared to 81.5% rural norm) of infants up to 24 months are receiving full immunization. The percent of mothers who were reported as smoking during pregnancy is 20.5% (2016 – 2018).

TAB 5. Osborne County population primary care service coverage is 1 provider (county based officed physicians either MDs and/or DOs) to 1805 residents. The percentage of patients who gave their hospital a rating of 9 or 10 out of 10 is only 87%, while 76% of patients reported Yes, They Would Definitely Recommend the Hospital. The average (median) time patients spend in the emergency department before leaving was 76 minutes.

TAB 6. In Osborne County, 20.6% of the Medicare population has depression. The percent of Medicare Part D beneficiaries receiving an opioid day supply >10 Days is 44.5%. The average mentally unhealthy days last reported (2017) is 3.6 days in a one-week period.

TAB 7a – 7b. Osborne County has an obesity percentage of 29% as of 2016, and physical inactivity percentage is 30.3%. The adult smoking is 15.9%, while the excessive drinking percentage is 16.9% as of 2017. The Medicare hypertension percentage is 56.2%, while their heart failure percentage is 24%. Osborne County recorded almost ten percent for those who have cancer (9.9%) among their Medicare population and 2.8% stroke percentage.

TAB 8. The adult uninsured rate for Osborne County is 12.3% (based on 2017) compared to the rural norm of only 11.9%.

TAB 9. The life expectancy rate in Osborne County is roughly seventy-seven years of age (77.3) for the entire general population in this county. Alcohol-impaired driving deaths for Osborne County is at 20% while age-adjusted Cancer Mortality rate per 100,000 is 178.8, while the Age-adjusted Heart Disease Mortality rate per 100,000 is at 244.

TAB 10. Forty seven percent (47%) of Osborne County has access to exercise opportunities. There are 15% of the population that have diabetes prevalence. Forty four percent (44%) of women in Osborne County seek annual mammography screenings (based on 2017).

Town Hall Review Past Unmet Needs: - During the virtual Town Hall session (via Zoom) on Tuesday, April 6th 2021, the table below (2018 CHNA unmet needs) was displayed amongst zoom attendees for discussion to confirm whether the past needs should move forward.

Osborne County, Kansas Past Stakeholder Feedback - 2018

II. Methodology

[VVV Consultants LLC]

II. Methodology

a) CHNA Scope and Purpose

The federal Patient Protection and Affordable Care Act (ACA) requires that each registered 501(c)3 hospital conduct a Community Health Needs Assessment (CHNA) at least once every three years and adopt a strategy to meet community health needs. Any hospital that has filed a 990 is required to conduct a CHNA. IRS Notice 2011-52 was released in late fall of 2011 to give notice and request comments.

JOB #1: Meet/Report IRS 990 Required Documentation

1. A description of the community served by the facility and how the community was determined;
2. A description of the process and methods used to conduct the CHNA;
3. The identity of any and all organizations with which the organization collaborated and third parties that it engaged to assist with the CHNA;
4. A description of how the organization considered the input of persons representing the community (e.g., *through meetings, focus groups, interviews, etc.*), who those persons are, and their qualifications;
5. A prioritized description of all of the community needs identified by the CHNA and an explanation of the process and criteria used in prioritizing such needs; and
6. A description of the existing health care facilities and other resources within the community available to meet the needs identified through the CHNA.

Section 501(r) provides that a CHNA must take into account input from persons who represent the broad interests of the community served by the hospital facility, including individuals with special knowledge of or expertise in public health. Under the Notice, the persons consulted must also include: Government agencies with current information relevant to the health needs of the community and representatives or members in the community who are medically underserved, low-income, minority populations, and populations with chronic disease needs. In addition, a hospital organization may seek input from other individuals and organizations located in or serving the hospital facility's defined community (e.g., health care consumer advocates, academic experts, private businesses, health insurance and managed care organizations, etc.).

JOB #2: Making a CHNA Widely Available to the Public

The Notice provides that a CHNA will be considered to be "conducted" in the taxable year that the written report of the CHNA findings is made widely available to the public. The Notice also indicates that the IRS intends to pattern its rules for **making a CHNA "widely available to the public"** after the rules currently in effect for Form 990. Accordingly, an organization would make a **facility's written report** widely available by posting the final report on its website either in the form of (1) the report itself, in a readily accessible format or (2) a link to another organization's website, along with instructions for accessing the report on that website. *The Notice clarifies that an organization must post the CHNA for each facility until the date on which its subsequent CHNA for that facility is posted.*

JOB #3: Adopt an Implementation Strategy by Hospital

Section 501(r) requires a hospital organization to adopt an implementation strategy to meet the needs identified through each CHNA. The Notice defines an “implementation strategy” as a written plan that addresses each of the needs identified in a CHNA by either (1) describing how the facility plans to meet the health need or (2) identifying the health need as one that the facility does not intend to meet and explaining why the facility does not intend to meet it. A hospital organization may develop an implementation strategy in collaboration with other organizations, which must be identified in the implementation strategy. As with the CHNA, a hospital organization that operates multiple hospital facilities must have a separate written implementation strategy for each of its facilities.

Great emphasis has been given to work hand-in-hand with leaders from hospitals, the state health department and the local health department. A common approach has been adopted to create the CHNA, leading to aligned implementation plans and community reporting.

IRS Requirements Overview (Notice 2011-52)

Notice and Request for Comments Regarding the Community Health Needs Assessment Requirements for Tax-exempt Hospitals

Applicability of CHNA Requirements to “Hospital Organizations”

The CHNA requirements apply to “hospital organizations,” which are defined in Section 501(r) to include (1) organizations that operate one or more state-licensed hospital facilities, and (2) any other organization that the Treasury Secretary determines is providing hospital care as its principal function or basis for exemption.

How and When to Conduct a CHNA

Under Section 501(r), a hospital organization is required to conduct a CHNA for each of its hospital facilities once every three taxable years. ***The CHNA must take into account input from persons representing the community served by the hospital facility and must be made widely available to the public. The CHNA requirements are effective for taxable years beginning after March 23, 2012.*** As a result, a hospital organization with a June 30 fiscal year end must complete a CHNA full report every 3 years for each of its hospital facilities by fiscal June 30th.

Determining the Community Served

A CHNA must identify and assess the health needs of the **community served** by the hospital facility. Although the Notice suggests that geographic location should be the primary basis for defining the community served, it provides that the organization may also take into account the target populations served by the facility (e.g., children, women, or the aged) and/or the facility’s principal functions (e.g., specialty area or targeted disease). *A hospital organization, however, will not be permitted to define the community served in a way that would effectively circumvent the CHNA requirements (e.g., by excluding medically underserved populations, low-income persons, minority groups, or those with chronic disease needs).*

Persons Representing the Community Served

Section 501(r) provides that a CHNA must take into account input from **persons who represent the broad interests of the community** served by the hospital facility, including individuals with special knowledge of or expertise in public health. Under the Notice, the persons consulted must also include: (1) government agencies with current information relevant to the health needs of the community and (2) representatives or members of medically underserved, low-income, and minority populations, and populations with chronic disease needs, in the community. In addition, a hospital organization may seek input from other individuals and organizations located in or serving the hospital facility’s defined community (e.g., health care consumer advocates, academic experts, private businesses, health insurance and managed care organizations, etc.).

Required Documentation

The Notice provides that a hospital organization will be required to separately document the CHNA for each of its hospital facilities in a **written report** that includes the following information: 1) a description of the community served by the facility and how the community was determined; 2) a description of the process and methods used to conduct the CHNA; 3) the identity of any and all organizations with which the organization collaborated and third parties that it engaged to assist with the CHNA; 4) a description of how the organization considered the input of persons representing the community (e.g., through meetings, focus groups, interviews, etc.), who those persons are, and their qualifications; 5) a prioritized

description of all of the community needs identified by the CHNA and an explanation of the process and criteria used in prioritizing such needs; and 6) a description of the existing health care facilities and other resources within the community available to meet the needs identified through the CHNA.

Making a CHNA Widely Available to the Public

The Notice provides that a CHNA will be considered to be “**conducted**” in the taxable year that the written report of the CHNA findings is made **widely available to the public**. The Notice also indicates that the IRS intends to pattern its rules for making a CHNA “widely available to the public” after the rules currently in effect for Forms 990. *Accordingly, an organization would make a facility’s written report widely available by posting on its website either (1) the report itself, in a readily accessible format, or (2) a link to another organization’s website, along with instructions for accessing the report on that website. The Notice clarifies that an organization must post the CHNA for each facility until the date on which its subsequent CHNA for that facility is posted.*

How and When to Adopt an Implementation Strategy

Section 501(r) requires a hospital organization to adopt an implementation strategy to meet the needs identified through each CHNA. **The Notice defines an “implementation strategy” as a written plan that addresses each of the needs identified in a CHNA by either (1) describing how the facility plans to meet the health need, or (2) identifying the health need as one that the facility does not intend to meet and explaining why the facility does not intend to meet it.** A hospital organization may develop an implementation strategy in collaboration with other organizations, which must be identified in the implementation strategy. As with the CHNA, a hospital organization that operates multiple hospital facilities must have a separate written implementation strategy for each of its facilities.

Under the Notice, an implementation strategy is considered to be “**adopted**” on the date the strategy is approved by the organization’s board of directors or by a committee of the board or other parties legally authorized by the board to act on its behalf. Further, the formal adoption of the implementation strategy must occur by the end of the same taxable year in which the written report of the CHNA findings was made available to the public. For hospital organizations with a June 30 fiscal year end, that effectively means that the organization must complete and appropriately post its first CHNA no later than its fiscal year ending June 30, 2013, and formally adopt a related implementation strategy by the end of the same tax year. *This final requirement may come as a surprise to many charitable hospitals, considering Section 501(r) contains no deadline for the adoption of the implementation strategy.*

IRS Community Health Needs Assessment for Charitable Hospital Organizations - Section 501(c)(3) Last Reviewed or Updated: 21-Aug-2020

In addition to the general requirements for tax exemption under Section 501(c)(3) and Revenue Ruling 69-545, hospital organizations must meet the requirements imposed by Section 501(r) on a facility-by-facility basis in order to be treated as an organization described in Section 501(c)(3). These additional requirements are:

1. Community Health Needs Assessment (CHNA) - Section 501(r)(3),
2. Financial Assistance Policy and Emergency Medical Care Policy - Section 501(r)(4),
3. Limitation on Charges - Section 501(r)(5), and
4. Billing and Collections - Section 501(r)(6).

Medically underserved populations include populations experiencing health disparities or that are at risk of not receiving adequate medical care because of being uninsured or underinsured, or due to geographic, language, financial, or other barriers. Populations with language barriers include those with limited English proficiency. Medically underserved populations also include those living within a hospital facility’s service area but not receiving adequate medical care from the facility because of cost, transportation difficulties, stigma, or other barriers.

Additionally, in determining its patient populations for purposes of defining its community, a hospital facility must take into account all patients without regard to whether (or how much) they or their insurers pay for the care received or whether they are eligible for assistance under the hospital facility's financial assistance policy. If a hospital facility consists of multiple buildings that operate under a single state license and serve different geographic areas or populations, the community served by the hospital facility is the aggregate of these areas or populations.

Additional Sources of Input

In addition to soliciting input from the three required sources, a hospital facility may solicit and take into account input received from a broad range of persons located in or serving its community. This includes, but is not limited to:

- Health care consumers and consumer advocates
- Nonprofit and community-based organizations
- Academic experts
- Local government officials
- Local school districts
- Health care providers and community health centers
- Health insurance and managed care organizations,
- Private businesses, and
- Labor and workforce representatives.

Although a hospital facility is not required to solicit input from additional persons, it must take into account input received from any person in the form of written comments on the most recently conducted CHNA or most recently adopted implementation strategy.

Collaboration on CHNA Reports

A hospital facility is permitted to conduct its CHNA in collaboration with other organizations and facilities. This includes related and unrelated hospital organizations and facilities, for-profit and government hospitals, governmental departments, and nonprofit organizations.

In general, every hospital facility must document its CHNA in a separate CHNA report unless it adopts a joint CHNA report. However, if a hospital facility is collaborating with other facilities and organizations in conducting its CHNA, or if another organization has conducted a CHNA for all or part of the hospital facility's community, portions of a hospital facility's CHNA report may be substantively identical to portions of the CHNA reports of a collaborating hospital facility or other organization conducting a CHNA, if appropriate under the facts and circumstances.

If two hospital facilities with overlapping, but not identical, communities collaborate in conducting a CHNA, the portions of each hospital facility's CHNA report relevant to the shared areas of their communities might be identical. So, hospital facilities with different communities, including general and specialized hospitals, may collaborate and adopt substantively identical CHNA reports to the extent appropriate. However, the CHNA reports of collaborating hospital facilities should differ to reflect any material differences in the communities served by those hospital facilities. Additionally, if a governmental public health department has conducted a CHNA for all or part of a hospital facility's community, portions of the hospital facility's CHNA report may be substantively identical to those portions of the health department's CHNA report that address the hospital facility's community.

Collaborating hospital facilities may produce a joint CHNA report as long as all of the collaborating hospital facilities define their community to be the same and the joint CHNA report contains all of the same basic information that separate CHNA reports must contain. Additionally, the joint CHNA report must be clearly identified as applying to the hospital facility.

Joint Implementation Strategies

As with the CHNA report, a hospital facility may develop an implementation strategy in collaboration with other hospital facilities or other organizations. This includes but is not limited to related and unrelated hospital organizations and facilities, for-profit and government hospitals, governmental departments, and nonprofit organizations. In general, a hospital facility that collaborates with other facilities or organizations

in developing its implementation strategy must still document its implementation strategy in a separate written plan that is tailored to the particular hospital facility, taking into account its specific resources. However, a hospital facility that adopts a joint CHNA report may also adopt a joint implementation strategy. With respect to each significant health need identified through the joint CHNA, the joint implementation strategy must either describes how one or more of the collaborating facilities or organizations plan to address the health need or identify the health need as one the collaborating facilities or organizations do not intend to address. It must also explain why they do not intend to address the health need.

A joint implementation strategy adopted for the hospital facility must also: Be clearly identified as applying to the hospital facility, Clearly identify the hospital facility's role and responsibilities in taking the actions described in the implementation strategy as well as the resources the hospital facility plans to commit to such actions, and Include a summary or other tool that helps the reader easily locate those portions of the joint implementation strategy that relate to the hospital facility.

Adoption of Implementation Strategy

An authorized body of the hospital facility must adopt the implementation strategy. See the discussion of the Financial Assistance Policy below for the definition of an authorized body.· This must be done on or before the 15th day of the fifth month after the end of the taxable year in which the hospital facility finishes conducting the CHNA. This is the same due date (without extensions) of the Form 990.

Acquired Facilities A hospital organization that acquires a hospital facility (through merger or acquisition) must meet the requirements of Section 501(r)(3) with respect to the acquired hospital facility by the last day of the organization's second taxable year beginning after the date on which the hospital facility was acquired. In the case of a merger that results in the liquidation of one organization and survival of another, the hospital facilities formerly operated by the liquidated organization will be considered "acquired," meaning they will have until the last day of the second taxable year beginning after the date of the merger to meet the CHNA requirements. Thus, the final regulations treat mergers equivalently to acquisitions.

New Hospital Organizations

An organization that becomes newly subject to the requirements of Section 501(r) because it is recognized as described in Section 501(c)(3) and is operating a hospital facility must meet the requirements of Section 501(r)(3) with respect to any hospital facility by the last day of the second taxable year beginning after the latter of: The effective date of the determination letter recognizing the organization as described in Section 501(c)(3), or · The first date that a facility operated by the organization was licensed, registered, or similarly recognized by a state as a hospital.

New Hospital Facilities

A hospital organization must meet the requirements of Section 501(r)(3), with respect to a new hospital facility it operates by the last day of the second taxable year beginning after the date the facility was licensed, registered, or similarly recognized by its state as a hospital.

Transferred/Terminated Facilities

A hospital organization is not required to meet the requirements of Section 501(r)(3) with respect to a hospital facility in a taxable year if the hospital organization transfers all ownership of the hospital facility to another organization or otherwise ceases its operation of the hospital facility before the end of the taxable year. The same rule applies if the hospital facility ceases to be licensed, registered, or similarly recognized as a hospital by a state during the taxable year. By extension, a government hospital organization that voluntarily terminates its Section 501(c)(3) recognition as described in Rev. Proc. 2018-5 (updated annually) is no longer considered a hospital organization for purposes of Section 501(r) and therefore is not required to meet the CHNA requirements during the taxable year of its termination.

Public Health Criteria:

Domain 1: Conduct and disseminate assessments focused on population health status and public health issues facing the community.

Domain 1 focuses on the assessment of the health of the population in the jurisdiction served by the health department. The domain includes systematic monitoring of health status; collection, analysis, and dissemination of data; use of data to inform public health policies, processes, and interventions; and participation in a process for the development of a shared, comprehensive health assessment of the community.

DOMAIN 1 includes 4 STANDARDS:

- **Standard 1.1** - Participate in or Conduct a Collaborative Process Resulting in a Comprehensive Community Health Assessment
- **Standard 1.2** - Collect and Maintain Reliable, Comparable, and Valid Data That Provide Information on Conditions of Public Health Importance and on the Health Status of the Population
- **Standard 1.3** - Analyze Public Health Data to Identify Trends in Health Problems, Environmental Public Health Hazards, and Social and Economic Factors That Affect the Public's Health
- **Standard 1.4** - Provide and Use the Results of Health Data Analysis to Develop Recommendations Regarding Public Health Policy, Processes, Programs, or Interventions

Required CHNA Planning Process Requirements:

- a. Participation by a wide range of community partners.
- b. Data / information provided to participants in CHNA planning process.
- c. Evidence of community / stakeholder discussions to identify issues & themes. Community definition of a "healthy community" included along with list of issues.
- d. Community assets & resources identified.
- e. A description of CHNA process used to set priority health issues.

Seven Steps of Public Health Department Accreditation (PHAB):

1. Pre-Application
2. Application
3. Document Selection and Submission
4. Site Visit
5. Accreditation Decision
6. Reports
7. Reaccreditation

MAPP Process Overview

Mobilizing for Action through Planning and Partnerships (MAPP) is a flexible strategic planning tool for improving the health and quality of life for the community. Like most strategic planning, MAPP involves organizing partners, creating a vision and shared values, collecting data, identifying areas for improvement, and developing goals and strategies to address them. Through collaboration with partners and the community, MAPP allows us to focus our efforts and work on issues to strengthen the local public health system.

The MAPP process includes the following six phases. It's important to note that MAPP has no set end point and will continue throughout the life cycle of the Community Health Improvement Plan (CHIP).

1. In this first phase, **Organize for Success/Partnership Development**, various sectors of the community with established relationships are reviewed, leading to the identification of areas for partnership development and creation of new relationships to enhance the MAPP process.
2. In the second phase, **Visioning**, a shared community vision and common values for the MAPP process are created.
3. In the third phase, **Four MAPP Assessments**, data is collected from existing and new sources about the health of our community, which results in a Community Health Assessment (CHA).
4. In the fourth phase, **Identify Strategic Issues**, community partners and health professionals select issues based on data collected from the third phase that are critical to the local public health system and align with the vision from the second phase.
5. In the fifth phase, **Formulate Goals and Strategies**, potential ways to address the strategic issues are identified by the community along with the setting of achievable goals. The final result is a Community Health Improvement Plan (CHIP).
6. The sixth and final phase of the MAPP process is the **Action Cycle**, which is where the work happens for meeting the objectives set in the previous phase. Through these collaborative efforts, the health of the community is improved.

Drivers of Health Assessment & Improvement Planning

Different drivers have led health agencies and organizations to institutionalize community health assessment and community health improvement planning in recent years.

National Voluntary Accreditation Requirements

In 2011, the Public Health Accreditation Board (PHAB), in partnership with key public health organizations, launched a new national voluntary accreditation program for state, tribal, local, and territorial health departments. The standards and measures encompass 12 domains of performance and include a comprehensive community health assessment (Domain 1, Standard 1.1) and a community health improvement plan (Domain 5, Standard 5.2). A documented community health assessment and improvement plan are two of the three prerequisites for applying to PHAB. PHAB requires that these processes be conducted collaboratively and that the documents be dated within the last five years. More information is available from [PHABexternal icon](#) and [CDC](#).

CDC Grant Requirements

CDC grants often require or encourage completing a community health assessment or improvement plan. In some cases, these plans provide valuable information for identifying priority health issues or needs. Examples include ; [National Public Health Improvement Initiative \(NPHII\)](#); [Community Transformation Grants or REACH Core](#)

The Public Health Accreditation board defines *community health assessment* as a systematic examination of the health status indicators for a given population that is used to identify key problems and assets in a community. The ultimate goal of a community health assessment is to develop strategies to address the community's health needs and identified issues. A variety of tools and processes may be used to conduct a community health assessment; the essential ingredients are community engagement and collaborative participation. Turnock B. *Public Health: What It Is and How It Works*. Jones and Bartlett, 2009, as adapted in [Public Health Accreditation Board Acronyms and Glossary of Terms Version 1.0 Cdc-pdf\[PDF – 536KB\]External](#), July 2011.

The Catholic Health Association defines a *community health needs assessment* as a systematic process involving the community to identify and analyze community health needs and assets in order to prioritize these needs, and to plan and act upon unmet community health needs.” Catholic Health Association, [Guide to Assessing and Addressing Community Health Needs Cdc-pdf\[PDF-1.5MB\]External](#), June 2013.

Social Determinants of Health

What Are Social Determinants of Health?

[Social determinants of health \(SDOH\)external icon](#) are defined as the conditions in which people are born, grow, live, work, and age. SDOH are shaped by the distribution of money, power, and resources throughout local communities, nations, and the world. Differences in these conditions lead to health inequities or the unfair and avoidable differences in health status seen within and between countries.

[Healthy People 2030external icon](#) includes SDOH among its leading health indicators. One of Healthy People 2030's five overarching goals is specifically related to SDOH: Create social, physical, and economic environments that promote attaining the full potential for health and well-being for all.

Through broader awareness of how to better incorporate SDOH throughout the multiple aspects of public health work and the [10 Essential Public Health Services](#), public health practitioners can transform and strengthen their capacity to advance health equity. Health equity means that everyone has a fair and just opportunity to be as healthy as possible. This requires removing obstacles to health, such as poverty, discrimination, and their consequences, including powerlessness and lack of access to good jobs with fair pay, quality education and housing, safe environments, and health care.

II. Methodology

b) Collaborating CHNA Parties

Working together to improve community health takes collaboration. Listed below is an in depth profile of the local hospital and Health Department CHNA partners:

Osborne County Memorial Hospital Profile

237 W Harrison St, PO Box 70, Osborne, KS 67473

Administrator: Marianna Harris

About Us: Osborne County Memorial Hospital (OCMH) is a Critical Access Hospital located in Northcentral Kansas. OCMH is a county owned hospital serving Osborne County and the surrounding communities. Governed by a board of 5 individuals appointed by the Osborne County Commissioners.

History: Osborne County Memorial Hospital (OCMH) was built as a district hospital in 1958. It was later transferred to Osborne County ownership through a vote of the people.

Our Board: The responsibility and authority for determining the hospital's mission, values and vision lies with the governing board. The board also is responsible for working with senior management to develop the goals, objectives and policies that grow out of, and are measured against, our mission, values and vision. Defining the hospital's mission and outlining a compelling vision of our future, with a recommended course of action to fulfill that vision, are among the most important contributions the board makes to our hospital's success.

The fiduciary responsibilities of the board are also important. The Board and Administration work together to establish an annual budget.

Services: Services include acute care, inpatient and outpatient surgical procedures, a full array of lab and radiology services, dietary, emergency medicine, inpatient and outpatient physical, occupational, and speech therapy, and swing-bed services.

- Acute Care
- Skilled Care
- Outpatient Clinics
 - o Urology, Cardiology, Pain, Surgery, Orthopedics and Behavioral Health
- Surgical Services
- Rural Health Clinic
- Rehabilitation Therapy (Physical, Occupational, Speech)
- Laboratory / Radiology
- Emergency Room,
- Cardiac Rehab
- Respiratory Therapy

Osborne County Health Department Profile

115 North First, Osborne, KS 67473

Administrator / Health Officer: Carla Manns, RN

Services:

- Adult Services
 - Nursing Clinics, Foot Care, Prescribed Injections, Counseling/Consultation
- Children's Services
 - Well Child Assessments, Child Care Licensing, Kansas Services for Children with Special Health Care Needs, Hearing/Vision Screens
- Immunizations (Child)
- Immunizations (Adult)
 - Adult Tetanus/Diphtheria or Tdap, Hepatitis B, Flu Shots, Pneumonia, Hepatitis A
- Maternal & Infant Care Program
- Healthy Start Home Visitor
- WIC (Nutrition Program for Women, Infants & Children)
- Family Planning
- Public Health Services
- Health Education
- Environmental Consultations (Part of the North Central LEPP Program)

Consultant Qualifications:

VVV Consultants LLC 601 N. Mahaffie, Olathe, KS 66061 (913) 302-7264

VVV Consultants LLC is an Olathe, KS based "boutique" healthcare consulting firm specializing in Strategy, Research and Business Development services. To date we have completed 70 unique community CHNA's in KS, MO, IA and NE (references found on our website VandehaarMarketing.com)

Vince Vandehaar, MBA – Principal

VVV Consultants LLC – start 1/1/09 *

- Adjunct Full Professor @ Avila and Webster Universities
- 35+ year veteran marketer, strategist and researcher
- Saint Luke's Health System, BCBS of KC,
- Tillinghast Towers Perrin, and Lutheran Mutual Life
- Hometown: Bondurant IA

Cassandra Kahl, BHS – Lead Consultant

VVV Consultants LLC – Nov 2020

- University of Kansas – Health Sciences
 - Park University MHA (May 2021)
- Pharmacy Management (CVS) – 2 ½ years
- Hometown: Maple, WI

VVV Consultants LLC (EIN 27-0253774) began as "VVV Research & Development INC" in early 2009 and converted to an LLC on 12/24/12. Web: VandehaarMarketing.com

Our Mission: to research, facilitate, train, and create processes to improve healthcare delivery and uncover strategic "critical success" initiatives.

Our Vision: meeting today's challenges with the voice of the market.

Our Values :

"Community" – Industry engagement...membership AMA KC, ACHE, EPBA, Forum and SHSMD.

"Stewardship" – Fair fees based on client, project scope, turnaround time, etc.

"Integrity" – Trustworthy delivery with numerous client recommendations / endorsements.

"Experience" – Skilled consulting; Marketing careers. We understand business because we have been there!

"Growth" – Process-driven; ongoing innovational delivery.

II. Methodology

c) CHNA and Town Hall Research Process

Wave #4 Community Health Needs Assessment (CHNA) process began in December 2020 for Osborne County Memorial Hospital (Osborne, KS) located in Osborne County, KS to meet Federal IRS CHNA requirements.

In early January 2021, the OCMH CEO requested a zoom conversation to review CHNA collaborative options. <Note: VVV Consultants LLC from Olathe, KS was asked to facilitate this discussion with the following agenda: VVV CHNA experience, review CHNA requirements (regulations) and discuss CHNA steps/options to meet IRS requirements and to discuss next steps.> Outcomes from this discussion led to OCMH CEO requesting VVV Consultants LLC to complete a comprehensive CHNA IRS aligned report.

VVV CHNA Deliverables:

- Document Hospital Primary Service Area - meets the 80-20 Patient Origin Rule.
- Uncover / document basic secondary research county health data, organized by 10 tabs.
- Conduct / report CHNA Community Check-in Feedback Findings (primary research).
- Conduct a Town Hall meeting to discuss with community secondary & primary data findings leading to determining (prioritizing) county health needs.
- Prepare & publish CHNA report which meets ACA requirements.

To ensure proper PSA Town Hall representation (that meets the 80-20 Patient Origin Rule), a patient origin three-year summary was generated documenting patient draw by zips as seen below:

Source: Internal Rec / KHA YR 2018-20				34,207	100%	
Osborne Co Memorial Hospital - IP /OP /ER / Clinic

County	3YR OCMH	FFY18	%	FFY19	%	FFY20	%
Osborne, KS	449	148	92.5%	154	87.0%	147	89.6%
Russell, KS	16	5	3.1%	6	3.4%	5	3.0%
Rooks, KS	15	2	1.3%	8	4.5%	5	3.0%
Mitchell, KS	11	3	1.9%	7	4.0%	1	0.6%

To meet IRS aligned CHNA requirements and meet Public Health accreditation criteria stated earlier, a four-phase methodology was followed:

Phase I—Discovery:

Conduct a 30-minute conference call with the CHNA county health department and hospital clients. Review / confirm CHNA calendar of events, explain / coach clients to complete required participant database and schedule / organize all Phase II activities.

Phase II—Qualify Community Need:

A) Conduct secondary research to uncover the following historical community health status for the primary service area. Use Kansas Hospital Association (KHA), Vital Statistics, Robert Wood Johnson County Health Rankings, etc. to document current state of county health organized as follows:

Health Indicators - Secondary Research
TAB 1. Demographic Profile
TAB 2. Economic Profile
TAB 3. Educational Profile
TAB 4. Maternal and Infant Health Profile
TAB 5. Hospital / Provider Profile
TAB 6. Behavioral / Mental Health Profile
TAB 7. High-Risk Indicators & Factors
TAB 8. Uninsured Profile
TAB 9. Mortality Profile
TAB 10. Preventative Quality Measures

Phase III—Quantify Community Need:

Conduct a 90-minute Town Hall meeting with required community primary service area residents. At each Town Hall meeting, CHNA secondary data will be reviewed, facilitated group discussion will occur and a group ranking activity to determine the most important community unmet health needs was administered.

Phase IV—Complete Data Analysis and Create Comprehensive Community Health Needs Assessment:

Complete full documentation to create each CHNA sections documented in Table of Contents. Publish hard copy reports (2) for client usage plus create a full CHNA report pdf to be posted on hospital website to meet government CHNA regulation criteria.

Data & Benchmarks Review

Community health assessments typically use both primary and secondary data to characterize the health of the community:

- **Primary data** are collected first-hand through surveys, listening sessions, interviews, and observations
- **Secondary data** are collected by another entity or for another purpose
- **Indicators** are secondary data that have been analyzed and can be used to compare rates or trends of priority community health outcomes and determinants

Data and indicator analyses provide descriptive information on demographic and socioeconomic characteristics; they can be used to monitor progress and determine whether actions have the desired effect. They also characterize important parts of health status and health determinants, such as behavior, social and physical environments, and healthcare use.

Community health assessment indicators should be

- Methodologically sound (valid, reliable, and collected over time)
- Feasible (available or collectable)
- Meaningful (relevant, actionable, and ideally, linked to evidence-based interventions)
- Important (linked to significant disease burden or disparity in the target community)

Jurisdictions should consider using data and indicators for the smallest geographic locations possible (e.g., county-, census block-, or zip code-level data), to enhance the identification of local assets and gaps.

Local reporting (County specific) sources of community-health level indicators:

CHNA Detail Sources
Business Quick Facts
Centers for Medicare and Medicaid Services
CMS Hospital Compare, 10/1/2015-9/30/2016
County Health Rankings
Geography Quick Facts
Kansas Health Matters
Kansas Hospital Association (KHA)
People Quick Facts
U.S. Department of Agriculture - Food Environment Atlas
US Centers for Disease Control and Prevention

Sources of community-health level indicators:

- [County Health Rankings and Roadmaps](#)
The annual Rankings measure vital health factors, including high school graduation rates, obesity, smoking, unemployment, access to healthy foods, the quality of air and water, income inequality, and teen births in nearly every county in America. They provide a snapshot of how health is influenced by where we live, learn, work and play.
- [Prevention Status Reports \(PSRs\)](#)
The PSRs highlight—for all 50 states and the District of Columbia—the status of public health policies and practices designed to prevent or reduce important public health problems.
- [Behavioral Risk Factor Surveillance System](#)
The world's largest, ongoing telephone health survey system, tracking health conditions and risk behaviors in the United States yearly since 1984. Data are collected monthly in all 50 states, the District of Columbia, Puerto Rico, the US Virgin Islands, and Guam.
- The [Selected Metropolitan/ Micropolitan Area Risk Trends](#) project was an outgrowth of BRFSS from the increasing number of respondents who made it possible to produce prevalence estimates for smaller statistical areas.
- [CDC Wonder](#) Databases using a rich ad-hoc query system for the analysis of public health data. Reports and other query systems are also available.
- [Center for Applied Research and Engagement System](#)[external icon](#)
Create customized interactive maps from a wide range of economic, demographic, physical and cultural data. Access a suite of analysis tools and maps for specialized topics.
- [Community Common](#)[external icon](#)
Interactive mapping, networking, and learning utility for the broad-based healthy, sustainable, and livable communities' movement.
- [Dartmouth Atlas of Health Care](#)[external icon](#)
Documented variations in how medical resources are distributed and used in the United States. Medicare data used to provide information and analysis about national, regional, and local markets, as well as hospitals and their affiliated physicians.
- [Disability and Health Data System](#)
Interactive system that quickly helps translate state-level, disability-specific data into valuable public health information.
- [Heart Disease and Stroke Prevention's Data Trends & Maps](#)
View health indicators related to heart disease and stroke prevention by location or health indicator.
- [National Health Indicators Warehouse](#)[external icon](#)
Indicators categorized by topic, geography, and initiative.
- [US Census Bureau](#)[external icon](#)
Key source for population, housing, economic, and geographic information.
- [US Food Environment Atlas](#)[external icon](#)
Assembled statistics on food environment indicators to stimulate research on the determinants of food choices and diet quality, and to provide a spatial overview of a community's ability to access healthy food and its success in doing so.
- [Centers for Medicare & Medicaid Services Research and Data Clearinghouse](#)[external icon](#)
Research, statistics, data, and systems.
- [Environmental Public Health Tracking Network](#)
System of integrated health, exposure, and hazard information and data from a variety of national, state, and city sources.
- [Health Research and Services Administration Data Warehouse](#)[external icon](#)
Research, statistics, data, and systems.
- [Healthy People 2030 Leading Health Indicator](#)[external icon](#)
Twenty-six leading health indicators organized under 12 topics.
- [Kids Count](#)[external icon](#)
Profiles the status of children on a national and state-by-state basis and ranks states on 10 measures of well-being; includes a [mobile site](#)[external icon](#).
- [National Center for Health Statistics](#)
Statistical information to guide actions and policies.
- [Pregnancy Risk Assessment and Monitoring System](#)
State-specific, population-based data on maternal attitudes and experiences before, during, and shortly after pregnancy.
- [Web-based Injury Statistics Query and Reporting System \(WISQARS\)](#)
Interactive database system with customized reports of injury-related data.
- [Youth Risk Behavior Surveillance System](#)
Monitors six types of health-risk behaviors that contribute to the leading causes of death and disability among youth and adults.

Specific Project CHNA roles, responsibility and timelines are documented by the following calendar.

Osborne County Memorial Hospital VVV CHNA Wave #4 Work Plan - Year 2021 Project Timeline & Roles			
Step	Timeframe	Lead	Task
1	12/1/2020	VVV / Hosp	Sent Leadership information regarding CHNA Wave #4 for review.
2	1/15/2021	Hosp	Received CEO approval - CHNA Wave #4 Option A BASIC
3	1/26/2021	VVV	Send out previous Community Roster file for update. Confirm PSA Stakeholders Names /Address /Emails
4	1/26/2021	VVV	Request hospital client to send KHA PO reports for FFY 18, 19 and 20. In addition, request hospital to complete 3 year historical PSA IP/OP/ER/Clinic patient zip origin file (Use ZipPSA_3yrPOrigin.xls)
5	Feb-Mar 2021	VVV	Assemble & complete Secondary Research - Find / populate 10 TABS. Create Town Hall ppt for presentation.
6	3/1/2021	VVV / Hosp	Prepare/send out PR story / E Mail Request announcing upcoming CHNA project to general community.
7	3/26/2021	Hosp	Prepare/send out Community Stakeholder Virtual TOWN HALL invite email to Roster names.
8	3/26/2021	VVV / Hosp	Prepare/send out PR #2 story to local media reminding community of virtual Town Hall. Send #2 Stakeholder Town Hall email asking for RSVP. VVV will mock-up both messages..
9	4/2/2021	ALL	Conduct conference call (time TBD) with Hospital (Public HLTH TBD) to review Town Hall data / meeting flow.
10	Tuesday 4/06/2021	VVV	Conduct virtual CHNA Town Hall 11:30-1pm. Review Basic health PSA data plus facilitate a community conversation to identify TOP Health Needs.
11	On or Before 5/21/2021	VVV	Complete Analysis - Release Draft 1- seek feedback from Client Leaders.
12	On or Before 5/28/2021	VVV	Produce & Release final CHNA report. Hospital will post CHNA online (website).
13	TBD	Hosp	Conduct Client Implementation Plan PSA Leadership meeting
14	On or Before 12/31/21	Hosp	Hold Board Meetings discuss CHNA needs, create & adopt an implementation plan. Communicate CHNA plan to community.

Overview of Virtual Town Hall Community Priority Setting Process

Each community has a wealth of expertise to be tapped for CHNA development. For this reason, a town hall is the perfect forum to gather community insight and provide an atmosphere to objectively consensus build and prioritize county health issues.

All Town Hall priority-setting and scoring processes involve the input of key stakeholders in attendance. Individuals and organizations attending the Town Halls were critically important to the success of the CHNA. The following list outlines partners invited to Town Hall: local hospital, public health community, mental health community, free clinics, community-based clinics, service providers, residents, community leaders, opinion leaders, school leaders, business leaders, local government, faith-based organizations, and persons (or organizations serving them), people with chronic conditions, uninsured community members, low-income residents, and minority groups.

Osborne County Memorial Hospital's Virtual Town Hall was held on Tuesday April 6th, 2021 via Zoom due to COVID-19 safety requirements. Vince Vandehaar MBA and Cassandra Kahl facilitated this 1 ½ hour session with twenty-two RSVP's / 19 attendees. (Note: a detail roster of Town Hall attendees is listed in Section V a).

The following Town Hall agenda was conducted:

1. Welcome & Introductions!
2. Review Purpose for the CHNA Town Hall & Process Roles
3. Present / Review of Historical County Health Indicators (10 TABS)
4. Facilitate Town Hall participant discussion of data (probe health strengths / concerns). Reflect on size and seriousness of any health concerns cited and discuss current community health strengths.
5. Engage Town Hall participants to rank health needs (casting 3 votes on priority issues). Tally & rank top community health concerns cited.
6. Close meeting by reflecting on the health needs / community voting results. Inform participants on "next steps."

At the end of each Town Hall session, VVV Consultants encouraged all community members to continue to contribute ideas to both hospital / health department leaders via e-mail and/or personal conversations. < NOTE: To review detail Town Hall discussion content, please turn to Section V for detailed notes of retreat session and activities citing health strengths & unmet health needs to change or improve.>

**Community Health Needs Assessment (CHNA)
Town Hall Discussion Agenda**

- I. **Check-In / Introductions** (Start: 11:20 – 11:35)
- II. **Review CHNA Purpose and Process** (11:35 – 11:40)
- III. **Review Current County “Health Status”** 11:40 – 12:10
 - Secondary Data by 10 TAB Categories
 - Review Past Community Unmet Needs - Previous CHNAs
- IV. **Collect Community Health Perspectives**
 - Assigned Breakout Sessions (Lead/Reporter)
 - Uncover unmet needs/reporting back discussion (12:10 - 12:40)
- V. **Returning To Community General Session**
 - Report up / Poll & End Town Hall (12:40 – 1:00)

2

**II. Review CHNA Focus and Process
Town Hall Roles / Duties**

- **Attendees**
 - Have Engaging Conversation (Be specific on your point)
 - No right or wrong answer)
 - Give truthful responses FINE FINE FINE
 - Take Notes – Make your list of Important Health Indicators
 - Complete Unmet Needs Poll – Representing Community
 - Chat – Log thoughts during meeting
- **Local Leads (During Breakout Rooms)**
 - Facilitate Community Conversation
 - Ensure Team Involvement – ALL speak up

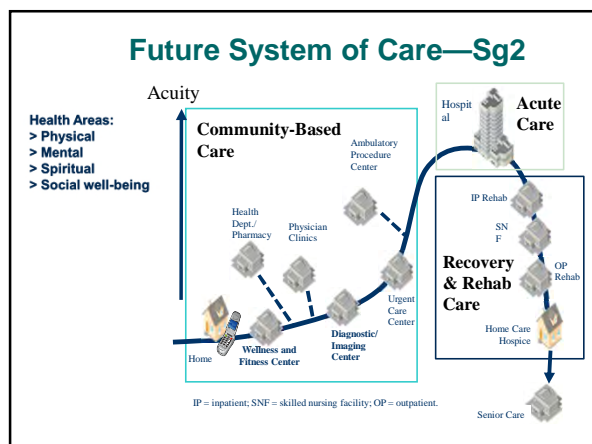

Have a little fun too

3

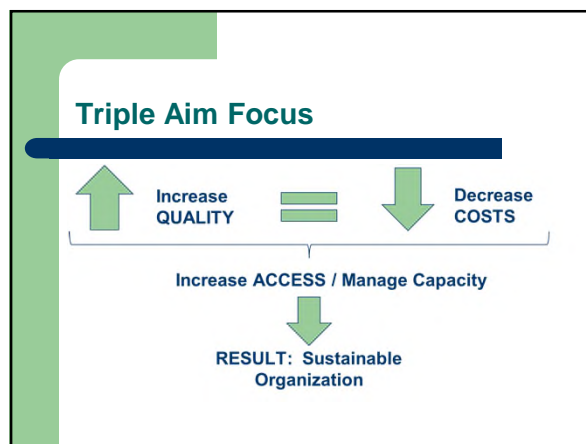

CHNA Brief Overview

- **A Community Health Needs Assessment (CHNA) is a....**
 - Systematic collection, assembly, analysis, and dissemination of information about the health of the community.
- **A CHNA's role is to....**
 - Identify factors that affect the health of a population and determine the availability of resources to adequately address those factors.
- **Purpose of a CHNA – Why Conduct One?**
 - Determine health-related trends and issues of the community
 - Understand / evaluate health delivery programs in place.
 - Meet Federal requirements – both local hospital and health department
 - Develop Implementation Plan strategies to address unmet health needs (4-6 weeks after Town Hall)

d) Community Profile (A Description of Community Served)

Osborne County Community Profile

Demographics

The population of Osborne County was estimated to be 3,721 citizens in 2017 which is a -0.5% change in population from 2010–2017. Osborne County covers a total of 893.1 square miles including the Alton Bluffs, Higgins Bluff and Center Twin Creek. The county has an overall population density of 4 persons per square mile.¹ The county was founded in 1867 and the county seat is Osbourne. The most common industries in Osborne County include agriculture, forestry, fishing and hunting, and mining, educational and health and social services.²

Major transportation in this area includes majority of state highways with U.S. Highway 70 a bit of the ways south of the county. Osborne County is in the northern central part of Kansas. Highway 281 runs north to south straight through the middle of the county. Highway 24 runs from east to west through the northern part of the county connecting Osbourne to larger cities like Manhattan.

III. Community Health Status

[VVV Consultants LLC]

III. Community Health Status

a) Historical Health Statistics- Secondary Research

Health Status Profile

This section of the CHNA reviews published quantitative community health indicators from public health sources and results of community primary research. To produce this profile, VVV Consultants LLC staff analyzed & trended data from multiple sources. This analysis focuses on a set of published health indicators organized by ten areas of focus (10 TABS), results from the 2020 RWJ County Health Rankings and conversations from Town Hall participants. Each table published reflects a Trend column, with GREEN denoting growing/high performance indicators, YELLOW denoting minimal change/average performance indicators and RED denoting declining/low performance indicators.

Note: The Robert Wood Johnson Foundation collaborates with the University of Wisconsin Population Health Institute to release annual *County Health Rankings*. As seen below, RWJ's model use a number of health factors to rank each county.>

County Health Rankings model ©2012 UWPHI

National Research – Year 2020 RWJ Health Rankings:

#	KS Rankings - 105 Counties	Definitions	Osborne Co (KS) 2021	TREND	NW KS RURAL NORM (N=20)
1	Health Outcomes		47		52
2	Mortality	Length of Life	38		42
3	Morbidity	Quality of Life	48		52
4	Health Factors		48		35
5	Health Behaviors	Tobacco Use, Diet/Exercise, Alcohol Use, Sexual Activity	31		39
6	Clinical Care	Access to care / Quality of Care	66		53
7	Social & Economic Factors	Education, Employment, Income, Family/Social support, Community Safety	57		44
8	Physical Environment	Environmental quality	22		22
http://www.countyhealthrankings.org , released 2020 Kansas Rural Norm (N=20) includes the following counties: Cheyenne, Barton, Edwards, Ellis, Gove, Kiowa, Norton, Osborne, Pawnee, Phillips, Russell, Sheridan, Smith and Thomas.					

PSA Secondary Research:

When studying community health, it's important to document health data by topical areas for primary service area (PSA). Below is a summary of key findings organized by subject area.

Note: Each Tab has been trended to reflect County trends to NORM.

hours ago)

Marianna Harris

to OCMH, bcc: me

TO: COMMUNITY LEADERS, PROVIDERS, BOARD AND STAFF

Osborne County Memorial Hospital (OCMH) is updating our 2018 Community Health Needs Assessment (CHNA). Over the next couple of months, OCMH will be working with area providers to complete the 2021 CHNA. The goal of this assessment is to understand community progress on addressing community health needs.

Your participation in providing feedback and suggestions regarding community health delivery is vital and will be collected virtually this year in order to take proper precautions due to COVID-19.

Please **HOLD THE DATE** for the virtual Town Hall scheduled for **Tuesday, April 6th, 2021, from 11:30 a.m. - 1:00 p.m.** via ZOOM. More information will be released late March on how to RSVP. If you have any questions about CHNA activities, please call (785) 346-2121 or email mharris@ocmh.net. Thank you in advance for your time and support!

Email #2 Message: bcc to Stakeholders List

From: Marianna Harris, CEO

Date: 3/26/2021

To: Community Leaders, Providers, Hospital Board and Staff

Subject: Osborne Co. Community Town Hall Scheduled – April 6th @ 11:30am – 1pm

Osborne County Memorial Hospital (OCMH) will be hosting a virtual Town Hall meeting for the 2021 Community Health Needs (CHNA) on **Tuesday, April 6th, 2021 11:30 a.m. - 1:00pm.** As COVID is still upon us, we are not able to meet in person for the sake of keeping community members safe. Therefore, this meeting will be held virtually via ZOOM.

This virtual meeting will consist of reviewing the community health indicators and gathering feedback opinions on key community health needs. It is imperative that everyone who plans to attend this meeting RSVPs for adequate preparation. We hope you find time to join us for this important event. To RSVP, please utilize the link below to complete this step. **Note>** For those who do RSVP, additional information will be sent out a few days prior to the event. Thanks in advance for your time and support!

- Participate in Zoom Unmet Needs Poll
- Wrap up discussion & review next steps.

Thank you in advance for contributing your time and support. We look forward to your Town Hall engagement. If you any further questions regarding this virtual Town Hall meeting, please contact me.

Osborne County Memorial Hospital 2021 Community Health Needs Assessment

Media Release: 2/18/21

Osborne County Memorial Hospital (OCMH) will be updating the 2018 Osborne County Community Health Needs Assessment (CHNA). Over the next few months, OCMH will be partnering with area providers to successfully complete the 2021 CHNA. <Note: ACA legislation requires all tax-exempt hospitals to submit a CHNA to the IRS every three years, regardless of hospital affiliation.>

“With COVID pandemic outbreak, Town Hall community input will be virtual this year to keep all safe” shared Marianna Harris, Osborne County Memorial Hospital, CEO.

The goal of this assessment update is to understand progress in addressing community health needs cited in the both the 2015 and 2018 assessment reports. VVV Consultants LLC, an independent research firm in Olathe KS, has been retained again to conduct this countywide research.

Additionally, please **HOLD THE DATE** for our virtual Town Hall session on **Tuesday, April 6th from 11:30 p.m. - 1:00 p.m** via Zoom. More information will be released in late March on how to RSVP so please be on the lookout. Thanks in advance for your time and support!

If you have any questions about CHNA activities, please call (785) 346-2121 or email mharris@ocmh.net

Join Osborne County Memorial Hospital as They Host A Virtual Town Hall

Media Release: 3/26/21

Osborne County Memorial Hospital (OCMH) will be hosting a virtual Town Hall meeting for the 2021 Community Health Needs Assessment on **Tuesday, April 6th, 2021, from 11:30 a.m. – 1 p.m.** via ZOOM.

While our focus is the safety of our community in conjunction with COVID guidelines, we have made the hard decision to hold this important meeting via ZOOM. During this meeting, we will review the community health indicators and gather feedback opinions on key community needs. We hope that you find the time to join us for this important virtual event.

Additionally, it is imperative that all those who plan to attend the virtual 2021 CHNA Town Hall on **April 6th**, utilize the link on our website to RSVP. This is especially important to adequately prepare for this event ahead of time. Thanks in advance for your support! Note> Those who RSVP will receive additional information a few days prior to the event.

If you have any questions about CHNA activities, please call (785) 346-2121 or email mharris@ocmh.net
